Objective

- Links

- Images

- Forms

- Readability

Links

Links are found in nearly all web pages. Links allow users to click their way from page to page.

You can add links to your web page as follows:

```
<a href="url">link text</a>
```

The **<a>** element is used toadd all links on a webpage. Using this element you can link to other pages in your website, external web pages and enable users to send an emai.l

```
<a href="https://www.w3schools.com/">Visit W3Schools.com!</a>
```

Images

Images can improve the design and the appearance of a web page.

You can add images to your web page as follows:

```
<img src="url" alt="alternatetext">
```

<img> does not have a closing tag
<img> attributes that can describe as follows:

```
<img src="img_girl.jpg" alt="Girl in a jacket" style="width:500px;height:600px;">
```

Forms

Different ways we give to the users to enter data in HTML.

At this stage, our forms won't be functional. You
will create forms that function correctly later
when you learn JavaScript.

First name:

John

Last name:

Doe

Submit

```
<form action="/action_page.php">
  <label for="fname">First name:</label><br>
  <input type="text" id="fname" name="fname" value="John"><br>
  <label for="lname">Last name:</label><br>
  <input type="text" id="lname" name="lname" value="Doe"><br><br>
  <input type="submit" value="Submit">
</form>
```

Readability

```html
<!DOCTYPE html><html><head>
<title>My first web page</title>
</head>
<body>
<form><label>First Name:</label><input type="text"><br>
<label>Surname:</label><input type="text"><br>
<label>Gender:</label>
<select><option value="male">Male</option>
<option value="female">Female</option></select>
<label>Age:</label>
<input type="text">
</form></body></html>
```
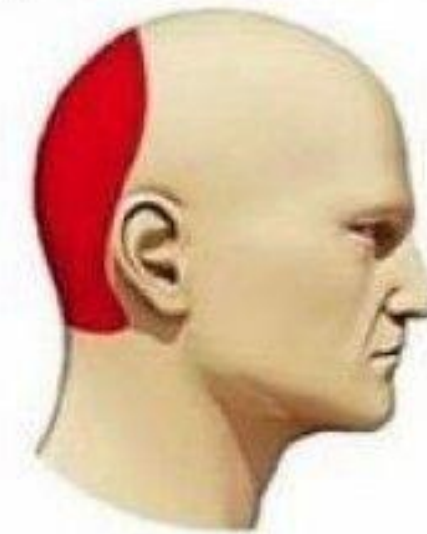

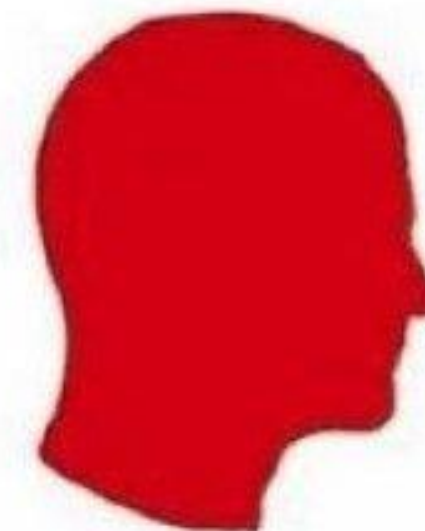

```html
<!DOCTYPE html>
<html>

<head>
    <title>My first web page</title>
    <!-- This is a comment, by the way -->
</head>

<body>
    <form>
        <label>First Name:</label>
        <input type="text"><br>
        <label>Surname:</label>
        <input type="text"><br>
        <label>Gender:</label> <br>
        <select>
            <option value="male">Male</option>
            <option value="female">Female</option>
        </select><br>
        <label>Age:</label><br>
        <input type="text"><br>
        <input type="submit" value="Add user">
    </form>
</body>

</html>
```
